

ms westfalia

We are a successful innovation-driven manufacturer specializing in the development, production and distribution of medical equipment with the focus on the ICU and surgery.

From the very beginning, our mission has been to develop and introduce advanced medical technologies onto the market. In the meantime, we are represented in more than 30 countries with our products. The reason of our success lies in the high quality of our products and professional qualification of our team members. With a practical success-oriented training program - MSW Academy - we contribute to promotion of innovations in the medical field. And last but not least, we believe that keeping customers happy with our performance is our most important goal.

To support our Production team in Troisdorf (Cologne-Bonn region) we are urgently looking for

Medical Equipment Service Engineer (m/f/d)

Key Responsibilities:

- Definition of test and service concepts
- Construction of test stands and functioning prototypes
- Verification of electronic and electromechanical assemblies & functions according to the specifications required for prototype and pre-series units
