

We are a successful innovation-driven manufacturer specializing in the development, production and distribution of medical equipment with the focus on the ICU and surgery.

From the very beginning, our mission has been to develop and introduce advanced medical technologies onto the market. In the meantime, we are represented in more than 30 countries with our products. The reason of our success lies in the high quality of our products and professional qualification of our team members.

With a practical success-oriented training program - MSW Academy - we contribute to promotion of innovations in the medical field.

And last but not least, we believe that keeping customers happy with our performance is our most important goal.

To support our R&D team in **Troisdorf** we are looking for

Product Manager ICU (m/w/d)

Key Responsibilities:

- You will define functions and device characteristics for the development of market analysis. You will plan, design and implement a new product strategy with focus on specific markets and target groups;
- You will design customer-oriented product concepts and contribute with your ideas on new development projects;
- You will create specifications, MRD, Use-cases and perform usability studies;
- You will design the training strategies and materials as well participate in event and training activities (in close collaboration with the Marketing, Sales and Clinical Application specialists);
- You will design, support and participate in the execution of clinical studies (for internal and external purposes) and analyze feedbacks to our products, as part of the R&D process;
- You will create customer-oriented documents, e.g., Instructions for use and White Papers;
- You will engage in ongoing scientific databases and literature research related to medical devices, technologies, innovations and related areas of interest with the scope of Intensive Care Medicine;
- You will engage in ongoing market research related to regional, national and international market trends and current as well as prospective market drivers;
- You will interface effectively across the organization with R&D, Sales, Regulatory Affairs and Customer Support.

Required Skills:

- A university degree in medicine, preferably with the focus on **Intensive Care/anesthesia** or in **medical engineering**;
- Preferably: At least 2 years of clinical experience and/or management experience within the fields of **Intensive Care, Emergency Care** and/or **Anesthesia**, with an extensive, demonstrable knowledge in at least two of the following fields: **ventilation, patient monitoring, anesthesia, and defibrillation**;
- Proficiency in English and German required. Fluency in other languages is desirable but not limitative;
- Flexibility, high resilience, organizational talent und own initiative;
- Personal engagement and the ability to work both independently and in teams.

We offer:

- You will become a part of the medical equipment company that operates on an international level and can offer you great opportunities for realization of your potential;
- Our cooperative and team-oriented corporate culture is characterized by pragmatic and short decision-making process;

[Geben Sie Text ein]

- Dynamic and fast growing environment will enable you for further professional and personal development;
- Ambitious individuals can find here support and exciting opportunities to implement their ideas and initiatives.
